URICLEAR

URICLEAR

This potent herbal extract is used to address common urinary system issues, such as stones and crystals, by “loosening” the urinary tract, promoting optimal flow and detoxification.

Synergistic Action For Whole System Support

- Loosens and clears urinary obstructions
- Soothes inflamed tissues
- Reduces infections and supports immunity
- Promotes diuresis and detoxification
- Strengthens and restores urinary tissues
- Supportive to standard of care treatments

PRODUCT OVERVIEW

herbal remedy for pets
Chanca Piedra,
Hydrangea, Gravel
Root, Marshmallow
Root, Dandelion Root,
Goldenrod, Horsetail,
Buchu, Cleavers,
Goldenseal, Cranberry

- individually Hand-crafted
- certified organic
- non-gmo
- kosher
- no fillers or binders
- no preservatives
- hand-selected harvesting
- zero-waste certified ingredients

use this blend for:

- urinary stones and crystals
- urinary tract infections
- irritation and inflammation of the bladder or urethra
- detoxification of urinary and systemic toxins
- supporting recovery from urinary damage or surgery

INGREDIENTS

chanca piedra

Commonly called “stone breaker”, chanca piedra is traditionally used to support the dissolution and prevention of kidney and bladder stones. It contains lignans and flavonoids that exhibit anti-lithic (stone dissolving) and anti-inflammatory properties. It may reduce calcium oxalate supersaturation and inhibit crystal aggregation, making it beneficial for preventing urinary calculi.

hydrangea

Hydrangea promotes urinary tract health by reducing inflammation and preventing sedimentation. It contains hydrangin, a coumarin derivative that supports smooth muscle relaxation and reduces the formation of calculi. It also acts as a diuretic, promoting the excretion of excess fluids and toxins.

INGREDIENTS

Gravel root is traditionally used to dissolve urinary stones and alleviate urinary discomfort. Rich in volatile oils and phenolic acids, it exhibits diuretic and anti-inflammatory properties. Its active compounds may reduce urinary sediment and support kidney function.

Marshmallow Root helps regulate mucous production. Mucous provides a protective film over inflamed mucosa. A soothing mucus layer can reduce irritation of the digestive and respiratory systems, allowing these tissues the ability to heal and regenerate faster. Mucous also provides a defense mechanism against additional dietary or environmental injury.

INGREDIENTS

Dandelion root acts as a diuretic and supports liver detoxification. It contains sesquiterpene lactones and inulin, which stimulate bile production and diuresis, aiding in the elimination of toxins through urine.

Dandelion leaf is a natural diuretic that supports kidney function and fluid balance. Rich in potassium, it offsets electrolyte loss from increased urination. It also contains flavonoids that enhance renal excretion of water and salts.

Goldenrod reduces inflammation and supports urinary tract health. It contains saponins, flavonoids, and essential oils that exhibit diuretic, antimicrobial, and anti-inflammatory effects. It is particularly effective in managing urinary tract infections and reducing urinary sediment.

INGREDIENTS

Horsetail strengthens connective tissues in the urinary tract and supports fluid balance. It contains silica, which promotes tissue repair and collagen production. Its diuretic properties increase urinary output while reducing irritation. It also contains thiaminase - an enzyme that degrades thiamine, a B Vitamin. However, this blend contains 1,260x under the minimum amount required for thiamine degradation.

Buchu is antimicrobial and antiinflammatory. It contains diosmin and rutin, chemicals found in the skin of various fruits that have been shown to be antibacterial and particularly effective against pathogens that cause urinary tract infections.

INGREDIENTS

cleavers

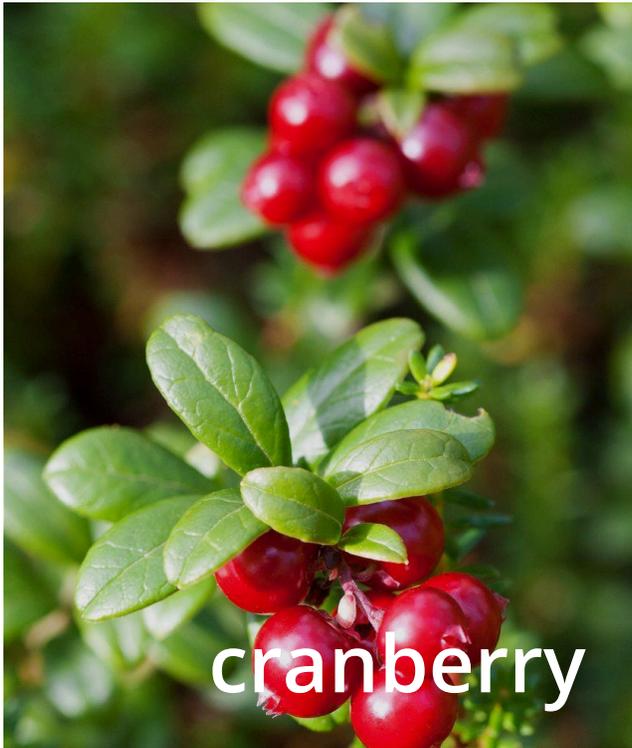

Cleavers promotes lymphatic drainage and urinary tract detoxification. It contains iridoid glycosides and tannins that enhance lymphatic movement and promote the elimination of toxins via urine. It also soothes inflamed tissues.

goldenseal

Goldenseal is a potent antimicrobial and anti-inflammatory herb for urinary health. It contains berberine, an alkaloid with antibacterial properties shown to be effective against pathogens like E.coli, a common cause of UTIs. It also reduces inflammation in mucous membranes.

INGREDIENTS

cranberry

Cranberry prevents urinary tract infections by reducing bacterial adhesion. It contains proanthocyanidins (PCAs), which prevent E.coli and other bacteria from adhering to the bladder walls, reducing risk of infections.
